

Overview

項目	托福新制	
測驗設計	閱讀/聽力採多階段適性測驗	
考題內容	真實學術情境, 跨文化設計	
分數呈現	同現 0–120 分制; 1–6 級分; CEFR 等級	
出分速度	最快 72 小時內	
在家測驗監考	ETS 官方訓練專員 + AI 驗證	
聽力 ~47 題 ~29 分鐘	Single Question Multiple Questions (2~4)	聆聽句子 Best Response 對話（生活情境）Conversation 公告 Announcement 學術講座 Lecture
口說 11 題 8 分鐘	P1. Listen and Repeat P2. Take an Interview	跟讀句子 7 句 面試式問答 4 題

Google Drive

TOEFL iBT

Choose the best response.

1.

- (A) The train is very fast.
- (B) No, I didn't find my keys.
- (C) I planted some flowers there.
- (D) Yes, it's just down those stairs.

2.

- (A) It was already taken when I drove by.
- (B) You can park it tomorrow.
- (C) He's at the front desk now.
- (D) Yes, I like to spark interest.

3.

- (A) The instruction manual is in the glove box.
- (B) I commute to the office by bike.
- (C) Yes, I saw two of them.
- (D) We should probably take the back roads then.

4.

- (A) I am going that way too.
- (B) It's about five dollars.
- (C) Yes, you can pay with cash.
- (D) The city is very big.

5.

- (A) He has a lot of energy.
- (B) No, it's running a few minutes behind schedule.
- (C) I'll express my gratitude later.
- (D) The coffee was quite bitter.

6.

- (A) I appreciate your valid point.
- (B) The play starts at eight.
- (C) No, I've never been to that theater.
- (D) I believe the machine is near the exit.

7.

- (A) Yes, I'll show you how to do it.
- (B) No, I didn't pay the bill yet.
- (C) You can use a credit card instead.
- (D) The utilities are included in the rent.

8.

- (A) I thought so too, but the price is the same.
- (B) I sailed across the bay last summer.
- (C) The machine isn't working today.
- (D) Yes, I'd like a cup of coffee.

9.

- (A) I need to buy a new rug for the office.
- (B) The setting was too bright for me.
- (C) I'm still working on the final numbers.
- (D) Yes, she has it on her desk.

10.

- (A) In that case, we should consider a fixed-rate plan.
- (B) I'll go to the bank this afternoon.
- (C) Yes, it's a very large building.
- (D) No, I'm not interested in that movie.

11.

- (A) The action movie starts at ten o'clock.
- (B) Yes, it was a very fast train.
- (C) I'll take the bus instead.
- (D) I think there were insufficient funds in the account.

12.

- (A) It's on channel five.
- (B) Usually at six o'clock.
- (C) Yes, I watched it.
- (D) I need to start my homework.

13.

- (A) The cast was very talented.
- (B) I'll go to the library tomorrow.
- (C) I've been listening to 'Past Events' lately.
- (D) No, I didn't see the post.

14.

- (A) I think the wall is painted blue.
- (B) They already moved the furniture.
- (C) How much will the monthly subscription be?
- (D) I read that article yesterday morning.

15.

- (A) Yes, it is a very interesting book.
- (B) Actually, he just signed off on it.
- (C) She's at the bookstore now.
- (D) He lives in a big story building.

16.

- (A) The view from the window is nice.
- (B) He saw it at the station.
- (C) It's supposed to be sunny all day.
- (D) I'll report it to the manager.

1. Could you help me find the platform for the downtown train?
(D) Yes, it's just down those stairs.
2. Wasn't there a parking spot available right in front of the building?
(A) It was already taken when I drove by.
3. The construction on the highway is going to double our commute time this morning.
(D) We should probably take the back roads then.
4. How much does a one-way ticket to the city center cost?
(B) It's about five dollars.
5. The 10:15 express bus hasn't arrived yet, has it?
(B) No, it's running a few minutes behind schedule.
6. Do you think we'll need to validate our parking ticket before we leave the theater?
(D) I believe the machine is near the exit.
7. Could you help me pay my utility bill online?
(A) Yes, I'll show you how to do it.
8. Wasn't that new coffee machine supposed to be on sale?
(A) I thought so too, but the price is the same.
9. You've already set up your monthly budget, haven't you?
(C) I'm still working on the final numbers.
10. The quarterly interest rates are likely to fluctuate quite a bit.
(A) In that case, we should consider a fixed-rate plan.
11. Why did the transaction fail to go through this morning?
(D) I think there were insufficient funds in the account.
12. What time does the evening news start?
(B) Usually at six o'clock.
13. Could you recommend a good podcast about history?
(C) I've been listening to 'Past Events' lately.
14. The newspaper is planning to move all its content behind a paywall next month.
(C) How much will the monthly subscription be?
15. The editor hasn't approved the front-page story yet, has he?
(B) Actually, he just signed off on it.
16. Did you see the weather report this morning?
(C) It's supposed to be sunny all day.

Conversation 1

1 What problem are the speakers discussing?

- (A) A textbook is currently unavailable to buy.
- (B) A library book has not been returned.
- (C) A student needs help with a work shift.
- (D) A biology seminar has been canceled.

2 What does the woman suggest the man do next?

- (A) Ask the professor for an extension.
- (B) Buy the book from another student.
- (C) Order the textbook from the publisher.
- (D) Borrow a copy from the library.

Script:

M: Did you happen to find the textbook for our biology seminar at the campus bookstore?

W: **Actually, I just came from there and they're completely sold out. Apparently, there was a delay with the publisher's shipment.**

M: That's disappointing. I need to start the reading for Wednesday's quiz before my work shift tonight.

W: **Why don't you check the library's reserve desk? They usually keep two copies of every required text for short-term use.**

M: That's a relief, I'll head over there now. Hopefully, one is available so I don't fall behind.

W: Good luck! Just make sure to bring your student ID, or they won't let you check it out.

Lecture 3

1 What is the main topic of the talk?

- (A) The benefits of increasing customer demand
- (B) The causes and effects of the bullwhip effect
- (C) The role of raw material suppliers in marketing
- (D) The history of global warehouse management

2 The speaker states that as the original demand signal moves toward raw material suppliers, it becomes:

- (A) Easier to manage via warehouse technology
- (B) More accurate due to professional verification
- (C) Significantly smaller due to logistical delays
- (D) A massive and artificial peak in demand

3 What challenge does the speaker identify regarding the use of information in the supply chain?

- (A) Information is often too expensive for small stores to buy
- (B) There is too much real-time data for companies to process
- (C) Decisions are being made based on incomplete information
- (D) Modern commerce is too reliant on digital communication

4 What does the speaker suggest about the relationship between different sectors of the supply chain?

- (A) They prioritize consumer satisfaction over making profits
- (B) They share too much data which leads to panic
- (C) They are usually located in the same geographic region
- (D) They act independently which causes system fragility

Script:

Have you ever wondered why a small increase in customer demand can lead to a massive shortage of products months later? **This is often caused by the 'bullwhip effect' in supply chain management. The process starts with a minor fluctuation in retail sales.** When a store sees a small spike in demand, the immediate result is a slightly larger order placed with the wholesaler to ensure they don't run out. But the consequences go further than that. The wholesaler, seeing the larger order from the store, panics and places an even bigger order with the manufacturer. This sets off a chain of over-ordering at every stage of the supply chain. **What many people don't realize is that by the time the message reaches the raw material suppliers, the original 'small increase' has transformed into a massive, artificial demand peak.** This ripples outward to affect global shipping costs and warehouse space. Eventually, the market becomes flooded with excess inventory that no one actually wants once the initial hype dies down. This demonstrates why real-time data sharing between stores and factories is so vital for modern commerce. **It makes us reflect on how fragile our global systems are when people stop talking to each other and start making guesses based on incomplete information.**

Lecture 7

1 What is the lecture mainly about?

- (A) Methods for improving consumer browsing speed
- (B) The effects of AI-driven personalization on consumer trust
- (C) The history of data privacy laws in digital marketing
- (D) The development of AI technology in footwear design

2 The speaker brings up the 'ghost in the machine' in order to:

- (A) Highlight the efficiency of automated customer service tools
- (B) Explain the technical architecture of neural networks
- (C) Describe the psychological discomfort caused by highly accurate prediction
- (D) Suggest that AI will eventually replace human marketers

3 The speaker states that when consumers feel their privacy is being invaded, they typically:

- (A) File formal complaints with government regulators
- (B) Employ technology to disconnect from the brand completely
- (C) Ask the brand questions about their data storage
- (D) Purchase the product quickly to stop the advertisements

4 The speaker mentions all of the following consumer reactions to personalized ads EXCEPT:

- (A) Requesting a refund for a shoe purchase
- (B) Engaging in brand avoidance through blocking
- (C) Expecting digital tailoring in other experiences
- (D) Feeling like they are being watched by a machine

Script:

You've probably noticed that after you search for a pair of shoes online, ads for those exact sneakers follow you to every website you visit. This starts with a brand using AI to analyze your browsing history and predict exactly what you want to buy next. The immediate outcome is a higher click-through rate, because the ads feel relevant to your life. Then, this triggers a deeper shift in consumer behavior where *people begin to expect every digital experience to be perfectly tailored to them*. However, a series of unintended reactions follows. **As algorithms get better at predicting our needs, it creates what experts call 'the creepiness factor.'** Customers feel like **they're being watched by a ghost in the machine**. The surprising part is that when consumers feel too exposed, **they don't just ignore the ads; they actively start using privacy tools to block the brand entirely**. So, **what started as a clever way to increase sales ends up destroying the very trust required to keep a customer loyal**. For the marketers behind these screens, it's a reminder that even in a world of big data, people still value their personal space.

Lecture 2

1 What is the lecture mainly about?

- (A) New methods for training corporate management teams
- (B) Software development techniques in the global economy
- (C) The financial history of traditional corporate pyramids
- (D) The characteristics and philosophy of Teal organizations

2 What does the speaker state about 'evolutionary purpose'?

- (A) It is a strategy used to slowly eliminate lower-performing workers
- (B) It requires companies to prioritize shareholder profits above all else
- (C) It treats the organization as a living entity with its own direction
- (D) It involves following a rigid five-year financial roadmap

3 What difficulty arises from the 'pyramid of bosses' model mentioned by the speaker?

- (A) It lacks the agility needed for rapid market fluctuations
- (B) It mandates that communication be radically transparent
- (C) It prevents managers from having enough authority
- (D) It ignores the importance of quarterly financial targets

4 Which of the following is NOT discussed as an outcome of the Teal model?

- (A) Elimination of all conflict
- (B) Increased employee engagement
- (C) Greater adaptation to market volatility
- (D) Radically transparent communication

Script:

Teal organizations represent an emergent paradigm in management theory characterized by **self-management, wholeness, and an evolutionary purpose**. One striking feature of this model is the total absence of traditional hierarchy; instead of a pyramid of bosses, authority is distributed among self-governing teams that operate with high levels of autonomy. Just as noteworthy is the emphasis on 'wholeness,' which encourages employees to bring their full emotional and creative selves to the workplace, rather than adopting a narrow professional mask. *This often manifests in radically transparent communication and unique conflict-resolution protocols.* **There is also the matter of evolutionary purpose, where the company is viewed as a living entity with its own direction, rather than a mere vehicle for hitting quarterly financial targets set by shareholders.** *All of these aspects come together in a system that prioritizes agility and employee engagement over rigid control structures.* **The net result of these factors is a workplace that can adapt to market fluctuations far more rapidly than a centralized bureaucracy.** *Essentially, the convergence of these three pillars creates a resilient ecosystem that thrives in the volatility of the modern global economy.* Recently, this model has gained significant traction among software development firms and healthcare providers looking for sustainable alternatives to the high-burnout environments of traditional corporate structures.

Lecture 6

1 What is the lecture mainly about?

- (A) The administrative failure of medieval governments
- (B) Factors contributing to the Hanseatic League's success
- (C) The design of specialized maritime vessels
- (D) The military expansion of Northern European nations

2 What difficulty does the speaker identify regarding the League's model in the modern world?

- (A) Contemporary ships are too large for medieval docks
- (B) Modern supply chains are less efficient than the 'cog'
- (C) The current global market is heavily regulated
- (D) Social networking hubs have become too expensive

3 What does the speaker suggest about the timing of the League's success?

- (A) It began only after the maritime laws were abolished
- (B) It was likely aided by the absence of strong state control
- (C) It was hindered by the lack of a standardized currency
- (D) It occurred despite fierce competition from modern corporations

4 According to the lecture, the 'Kontor' hubs were used for all of the following EXCEPT:

- (A) Managing overseas activity
- (B) Trust-building
- (C) Taxing local citizens
- (D) Intelligence gathering

Script:

During the late Middle Ages, a powerful federation known as the Hanseatic League dominated commercial activity across Northern Europe without ever possessing its own government. Understanding this alliance is vital for grasping early corporate strategy. **A primary pillar of the League's success was its sophisticated legal framework, which established uniform maritime laws across disparate port cities.** Furthermore, its logistical prowess was unprecedented; the development of the 'cog'—a high-capacity sailing ship—allowed for the mass transport of bulk goods like salt and grain, revolutionizing the supply chain. Beyond these practicalities, a third crucial element was its social networking system, the 'Kontor.' *These overseas merchant hubs acted as centers for intelligence gathering and trust-building among traders.* The true strength of the Hanseatic League lay in how these legal, logistical, and social structures reinforced one another to create a monopoly that lasted for centuries. We must ask ourselves: **could such a decentralized, non-state entity survive in today's highly regulated global market, or was its success purely a product of that specific historical vacuum?**

Lecture 1

1 What is the lecture mainly about?

- (A) The history of smartphone technology and price drops
- (B) Tactics for startups to avoid competition in new markets
- (C) A traditional pricing model and its modern limitations
- (D) A specific comparison of various entry barriers in business

2 What did researchers discover about brand loyalty in recent markets?

- (A) It is higher for startups than for established brands
- (B) It is unaffected by the pricing of digital products
- (C) It has increased among high-tech smartphone users
- (D) It declined significantly due to high initial pricing

3 What does the speaker suggest about startups in the current market?

- (A) They should ignore the pricing strategies of mid-tier competitors
- (B) They need to be cautious about setting very high initial prices
- (C) They should avoid high-tech goods altogether
- (D) They should focus on short-term months rather than long-term years

4 According to the smartphone sales study, which of the following was NOT a result of aggressive skimming?

- (A) Movements toward mid-tier competitors
- (B) Damage to brand reputation
- (C) A 15% decrease in brand loyalty
- (D) Increased demand for used tech products

Script:

Last week we touched upon entry barriers, and today I want to focus on a specific pricing model called **price skimming**. This idea suggests that a firm can maximize profits by setting the highest possible initial price for a new product, then gradually lowering it over time. For decades, the accepted view was that this strategy worked best for high-tech goods with no immediate competition. The standard reasoning was that early adopters are willing to pay a premium for the 'latest and greatest,' while the subsequent price drops attract more budget-conscious segments. This behavior was widely linked to the perceived prestige of being first. **But recent evidence challenges this view.** A comprehensive analysis of smartphone sales data from the last five years revealed that *aggressive skimming can actually damage a brand's reputation and push customers toward mid-tier competitors who offer stable pricing.* **In several major markets, researchers discovered that consistently high initial costs led to a 15% decrease in long-term brand loyalty.** This indicates that modern consumers value price transparency and fairness more than the novelty of a new release. What this points to is a need for companies to rethink the 'harvesting' phase of their product lifecycle if they want to keep their customers for years rather than just months. **This discovery has significant implications for how startups should value their initial offerings in a crowded digital marketplace.**

Lecture 5

1 What is the main topic of the talk?

- (A) New methods of instant messaging
- (B) The history of the modern cubicle
- (C) Techniques for effective office design
- (D) The failure of the open-plan office

2 What is the purpose of discussing the Harvard University study from 2018?

- (A) To emphasize the necessity of instant messaging in business
- (B) To show that communication trends change every year
- (C) To prove that electronic badges are effective tracking tools
- (D) To provide evidence that contradicts the 'Open Office Concept'

3 According to the speaker, what difficulty arises from the lack of privacy in open offices?

- (A) Innovation becomes impossible without physical walls.
- (B) Management cannot track employee movement effectively.
- (C) Employees stop using technology altogether.
- (D) Workers use digital tools specifically to avoid others.

4 All of the following are parts of the 'Open Office Concept' theory EXCEPT:

- (A) Spontaneously increasing innovation
- (B) Removing physical barriers between workers
- (C) Lowering the building's maintenance costs
- (D) Increasing collaboration between departments

Script:

Why do so many modern companies still insist on ripping down cubicle walls despite employee complaints? **In business management, the 'Open Office Concept' is a model stating that removing physical barriers between workers will spontaneously increase collaboration and innovation.** For decades, the accepted view was that face-to-face interactions would soar if people just sat next to each other. This was primarily attributed to the 'spontaneous encounter' effect, *where workers from different departments supposedly share ideas more freely*. **But fresh data from 2018 at Harvard University challenges this view. Researchers tracked employees using electronic badges and discovered that after moving to an open floor plan, face-to-face interaction actually dropped by roughly 70 percent. Instead of talking more, people retreated into their headphones and used instant messaging to avoid the noise and lack of privacy.** What this points to is that physical proximity doesn't guarantee psychological openness. The irony is that the very design intended to foster community ended up creating a 'silent office' where digital communication replaced real human speech.

Lecture 4

1 What is the main topic of the talk?

- (A) The history of assembly line manufacturing
- (B) The emergence of new programming languages
- (C) The move from cost-based to value-based outsourcing
- (D) The impact of domestic wage laws on tech firms

2 The speaker brings up 'integrated teams' in order to illustrate:

- (A) The difficulty of managing different corporate cultures
- (B) The way domestic and offshore teams compete
- (C) The shift toward collaborative, synchronous development
- (D) The high cost of maintaining shared management tools

3 What is a possible problem that modern strategies try to solve by using 'operational proximity'?

- (A) The rising costs of factory assembly lines
- (B) The lack of available global talent for niche technologies
- (C) The disconnect caused by vastly different time zones
- (D) The high turnover rate of domestic engineering teams

4 What does the speaker state about the results of using 'near-shoring' and 'co-sourcing'?

- (A) Domestic departments were eventually shut down entirely
- (B) The rate at which employees left the company dropped significantly
- (C) Corporate contracts were signed for longer terms
- (D) Software engineers required less technical training

Script:

It might surprise you to learn that nearly 50 percent of all large-scale corporate outsourcing contracts are terminated early due to performance issues. For years, the tech industry has struggled with the high costs of maintaining domestic engineering teams. In the early 2000s, many firms tried to solve this by moving entire development departments to regions with much lower labor costs. The initial response was to treat software creation like a factory assembly line, focusing purely on reducing the hourly rate. But this approach backfired because it ignored the complexities of cultural communication and timezone synchronous work. The problem was that the 'savings' on wages were quickly erased by the massive delays in fixing bugs and the decline in overall product quality. So what did work? A different strategy emerged when companies shifted to 'near-shoring' and 'co-sourcing.' **Instead of just looking for the cheapest labor, firms began building integrated teams in similar time zones and investing in shared management tools. The results were striking; projects stayed on schedule and employee turnover plummeted. The lesson here is that in the digital economy, value is derived from collaboration rather than just cost-cutting.** Today, this approach has become the gold standard for global business strategy, synthesizing the benefits of global talent with the necessity of operational proximity.

Lecture 8

1 What is the lecture mainly about?

- (A) Technical challenges of modern digital banking
- (B) The role of the World Bank in rural areas
- (C) The history of gold-backed currency
- (D) The shift from subsidized to social-based lending

2 What can be inferred about government-subsidized loans mentioned in the lecture?

- (A) They were ineffective because they were too expensive to manage
- (B) They were more popular with entrepreneurs than group-lending
- (C) They successfully modernized the global banking sector
- (D) They required borrowers to provide physical collateral

3 What is the purpose of the speaker's reference to 'gold bars in a vault'?

- (A) To metaphorically compare the reliability of trust to traditional assets
- (B) To emphasize the physical security required for rural banks
- (C) To highlight the high repayment rates of the group-lending model
- (D) To suggest that gold is a poor investment for local entrepreneurs

4 Which of the following is NOT mentioned as a factor in the success of the Grameen Bank model?

- (A) Peer pressure
- (B) Group guarantees
- (C) Community support
- (D) Low interest rates

Script:

Conventional wisdom suggests that large-scale institutional lending is the only way to modernize an economy, yet the most significant financial revolutions often occur through tiny, peer-to-peer transactions. For decades, the global banking sector struggled with 'unbankable' populations—individuals in developing nations with no collateral or credit history. The initial attempt to bridge this gap involved government-subsidized loans with low interest rates. Unfortunately, **this strategy faltered because the high administrative costs of processing small loans outweighed the social benefits**, leading to massive defaults and systemic corruption. **A more viable framework surfaced when organizations like Grameen Bank introduced the 'group-lending' model. Instead of relying on physical assets, this system utilized social collateral, where small groups of neighbors collectively guaranteed each other's loans. Peer pressure and community support ensured repayment rates exceeded 95 percent.** The results were transformative, lifting millions out of poverty by funding local entrepreneurs. **The core takeaway is that trust and social bonds can be more valuable than gold bars in a vault.** Today, this philosophy has migrated from rural villages to the digital world, fueling the global crowdfunding and peer-to-peer lending platforms that define modern fintech.

Speaking Task 1

Set 1: Art Museum

You are being trained to assist visitors at an art museum's information desk.

- 1 Welcome to our gallery tour.
- 2 Do you have your admission tickets?
- 3 Please leave your large bags here.
- 4 The photography exhibit is on the lower level.
- 5 Our gift shop carries a variety of unique handmade souvenirs.
- 6 You can join a guided walk through the sculpture garden at noon.
- 7 If you need a map, feel free to grab one from the stand near the elevator.

Set 2: Theater Box Office

You are being trained to assist customers at a theater box office.

- 1 Have you already purchased your tickets?
- 2 Premium seating is located in center orchestra.
- 3 Please check your ticket for the correct door number.
- 4 The performance includes a brief intermission after the second act.
- 5 Late arrivals must wait for a suitable break before entering the auditorium.
- 6 For your safety, kindly remain in your seats until the house lights come up.
- 7 We offer a digital program that can be accessed by scanning the code on your seat.

Set 3: Airport Checkin

You are being trained to assist passengers at an airport check-in counter.

- 1** May I see your passport?
- 2** Place your large suitcase on the scale.
- 3** Your flight is boarding at gate twenty.
- 4** Would you like a window or an aisle seat?
- 5** The departures screen will show any changes to your flight time.
- 6** Business class passengers can use the private lounge near the security area.
- 7** You should arrive at your boarding gate at least thirty minutes before the plane takes off.

SPEAKING TASK 2: INTERVIEW

Set 1 Outdoor Activities

You will be asked 4 questions. Listen to each question and give your response. You have 45 seconds to respond to each question.

Question 1: I appreciate you joining me today. I'd like to ask about outdoor activities. What kind of outdoor activities do you or your friends generally enjoy doing? For example, do you like hiking in the woods, cycling on trails, or playing team sports in a park?

Question 2: That's helpful to know. When you spend time in nature, do you prefer to go to a very quiet, remote place, or do you prefer to visit popular parks where there are many other people? Why?

Question 3: Interesting. Next, I'd like to get your perspective on something. Many people now use social media to share photos of their outdoor adventures. Do you think this trend will encourage more people to explore nature in the future? Why or why not?

Question 4: Good points. I have one final question for you. Some people believe that schools should require students to participate in outdoor survival or nature programs. Do you agree with this idea, or do you think physical education should stay focused on traditional indoor sports? Explain your answer.

Question 1

I appreciate you joining me today. I'd like to ask about outdoor activities. What kind of outdoor activities do you or your friends generally enjoy doing? For example, do you like hiking in the woods, cycling on trails, or playing team sports in a park?

Brainstorming Table:

Answer Angle	\$ (Money)	Time	Ppl (Connection)	Extra (Skill/Health)
Solo physical activities (Focus: Personal growth and efficiency)	Eliminates monthly gym membership fees of \$50-\$100; requires only a one-time investment in quality running shoes or a basic road bike.	Zero commute time to a fitness center; allows for spontaneous 30-minute HIIT sessions in a local park during lunch breaks.	Provides essential 'me-time' to decompress from office stress; avoids the pressure of matching someone else's pace or schedule.	Builds mental resilience by pushing through physical fatigue alone; improves cardiovascular health and Vitamin D levels through sunlight exposure.
Solo physical activities (Focus: Practicality and skill mastery)	Saves money on coaching or league entry fees; allows for purchasing second-hand gear like kayaks or climbing shoes on digital marketplaces.	Flexible scheduling means no waiting for teammates to arrive; maximizes active minutes by focusing strictly on one's own technique.	Reduces social anxiety for beginners who feel self-conscious; allows for quiet observation of nature and local wildlife without distraction.	Develops specialized technical skills like navigating trail maps or mastering a specific swimming stroke; enhances spatial awareness in varied terrain.
Group team sports (Focus: Social bonding and networking)	Splitting the cost of equipment like soccer balls or portable nets; accessing group discounts for tournament registration or field rentals.	Fixed weekly schedules create a disciplined routine; carpooling with teammates reduces individual driving time to suburban sports complexes.	Fosters a sense of belonging through shared victories and losses; creates networking opportunities with diverse professionals in a casual setting.	Develops critical soft skills like verbal communication under pressure and strategic cooperation; enhances agility and reaction time through competitive play.
Group team sports (Focus: Community impact and accountability)	Relies on free public infrastructure like municipal basketball courts or grass parks; avoids the high cost of individual boutique fitness classes.	The social obligation to teammates prevents skipping workouts on lazy days; social interaction after the game combines exercise and socializing into one block.	Strengthens community ties by interacting with neighbors; provides a support system that reduces feelings of urban isolation and loneliness.	Encourages leadership skills when organizing team logistics or captaining a game; provides high-intensity interval training that burns more calories than steady-state walking.

SPEAKING TASK 2: INTERVIEW

Set 2 Travel Habits

You will be asked 4 questions. Listen to each question and give your response. You have 45 seconds to respond to each question.

Question 1: Thanks for being here. Let's talk about travel habits. What kind of destinations do you or your friends generally like to visit? For example, do you prefer tropical beaches, historic cities, or remote mountain areas?

Question 2: Great, thanks for sharing. When you are choosing a place to stay, do you prefer to book a well-known international hotel chain, or do you like to stay in a small, locally-owned guesthouse? Why?

Question 3: OK, let me ask you about a broader trend. Many travelers are now choosing destinations specifically because they are less crowded than famous tourist spots. Do you think this trend of visiting 'hidden gems' will continue to grow in the future? Why or why not?

Question 4: Those are valid observations. Lastly, I'd like to ask about something else. Some people believe that international travel is essential for reducing cultural prejudice and promoting global peace. Do you agree with this idea, or do you think there are other ways to achieve these goals without traveling? Explain your perspective.

Question 1

Thanks for being here. Let's talk about travel habits. What kind of destinations do you or your friends generally like to visit? For example, do you prefer tropical beaches, historic cities, or remote mountain areas?

Brainstorming Table:

Answer Angle	\$ (Money)	Time	Ppl (Connection)	Extra (Skill/Health)
Historic Cities (Focus: Educational Value)	Museum entrance fees and guided walking tours can be expensive. However, investing in a city pass provides access to multiple landmarks at a discounted rate.	Densely packed urban centers allow for visiting three or four cultural sites in a single afternoon. Public transit like subways eliminates time wasted in traffic.	Interacting with local artisans and museum curators provides a deep dive into the region's heritage. Group tours foster connections with fellow history enthusiasts.	Walking between monuments provides steady cardiovascular exercise. Navigating complex transit systems and learning historical facts sharpens cognitive skills and spatial awareness.
Historic Cities (Focus: Convenience and Infrastructure)	Budget-friendly hostels and diverse street food options make city travel accessible for students. Competitive pricing between ride-share apps keeps local transport costs low.	Proximity to international airports means less time commuting from the terminal to the hotel. 24-hour amenities ensure that travelers can maximize every hour of their trip.	The high population density makes it easy to meet people at social hubs like cafes or coworking spaces. Diverse neighborhoods offer exposure to multicultural communities.	Constant exposure to foreign signage and menus helps with practical language acquisition. Urban environments offer immediate access to high-quality medical facilities if needed.
Tropical Beaches (Focus: Wellness and Relaxation)	All-inclusive resorts provide a predictable upfront cost that covers meals and drinks. Off-season bookings at coastal towns can lead to significant savings on beachfront lodging.	The slow pace of life encourages travelers to disconnect from digital schedules. Spending full days in one location eliminates the stress of rushing between different attractions.	The relaxed atmosphere is ideal for deep, uninterrupted conversations with family or partners. Shared activities like beach volleyball or snorkeling create low-pressure social bonds.	Swimming in the ocean provides a full-body workout that is easy on the joints. Exposure to sunlight boosts Vitamin D levels and significantly reduces cortisol and stress.
Tropical Beaches (Focus: Adventure and Nature)	Renting specialized gear like scuba tanks or surfboards represents a specific equipment investment. Local boat charters for island hopping can be split among a group to save funds.	Travelers must account for the time required to reach secluded coves or coral reefs by boat. Daily schedules are often dictated by natural cycles like tides or sunrise.	Joining a diving boat or surf camp connects you with a global community of outdoor enthusiasts. Working with local guides to find hidden spots fosters mutual respect and cultural exchange.	Learning to surf or paddleboard develops core strength and balance. Engaging with marine ecosystems builds an understanding of environmental conservation and biodiversity.

SPEAKING TASK 2: INTERVIEW

Set 3 Reading Habits

You will be asked 4 questions. Listen to each question and give your response. You have 45 seconds to respond to each question.

Question 1: Hello! I'm glad you could chat with me. I have some questions about reading habits. What kind of books do you or your friends generally like to read? For example, do you prefer adventure stories, science books, or mystery novels?

Question 2: I see what you mean. When you want to read a new story, do you prefer to use a digital e-reader or do you like to read a physical paper book? Tell me why.

Question 3: That makes sense. Now, shifting to a bigger picture question. Nowadays, many people are choosing to listen to audiobooks instead of reading text. Do you think that more people will stop buying printed books in the future? Why or why not?

Question 4: Thanks for those thoughts. Let me ask you one more thing. Some people believe that school students should only read classic literature, while others think they should be allowed to choose any book they enjoy. Which view do you agree with and why?

Question 1

Hello! I'm glad you could chat with me. I have some questions about reading habits. What kind of books do you or your friends generally like to read? For example, do you prefer adventure stories, science books, or mystery novels?

Brainstorming Table:

Answer Angle	\$ (Money)	Time	Ppl (Connection)	Extra (Skill/Health)
Educational Non-fiction (Focus on Professional Growth)	Investing in textbooks or industry guides leads to higher salaries and faster promotions. These books provide high ROI compared to expensive weekend seminars.	Reading summaries or chapters daily maximizes productivity during commutes. It eliminates the time wasted on trial-and-error at work.	Sharing insights from business books builds professional credibility with colleagues. It provides high-value talking points during networking events.	Readers acquire specialized technical knowledge and data analysis skills. This habit sharpens critical thinking and logical problem-solving abilities.
Educational Non-fiction (Focus on Practical Life Skills)	Books on personal finance or DIY home repair prevent costly mistakes and unnecessary service fees. Digital library apps offer these resources for free.	Learning a skill through a structured book is faster than searching through disorganized internet forums. It streamlines the learning curve for complex hobbies.	Friends often bond over shared self-improvement goals or fitness challenges found in health books. Mentorships often begin by discussing a common influential text.	Reading about psychology or health improves emotional intelligence and mental well-being. It fosters a growth mindset and self-discipline.
Escapist Fiction (Focus on Stress Relief and Mental Health)	Fiction provides hours of entertainment for the price of a single paperback. It is a cheaper alternative to cinema tickets or gaming subscriptions.	Immersing oneself in a mystery novel provides a necessary mental break from a frantic work schedule. It serves as a healthy 'wind-down' ritual before sleep.	Fictional characters help readers develop empathy by experiencing different perspectives. Book clubs centered on novels create strong community bonds through shared emotional reactions.	Engaging with complex plots improves vocabulary and creative writing skills. The deep focus required for long-form fiction reduces anxiety and lowers cortisol levels.
Escapist Fiction (Focus on Social Connection and Trends)	Popular series like 'Harry Potter' or 'Dune' have high resale value in used bookstores. Buying mass-market paperbacks is an affordable way to stay current with pop culture.	Audiobooks allow friends to 'read' together while multitasking at the gym or driving. It turns dead time into a shared narrative experience.	Reading trending adventure stories makes it easier to join conversations in social circles. Online fandoms provide a sense of belonging to a global community.	Fiction stimulates the imagination and enhances 'out-of-the-box' thinking. Exploring diverse fictional cultures broadens one's global awareness and tolerance.
