Conversation 1

1 What are the speakers mainly discussing?

- (A) The best parks for small animals
- (B) Methods for finding a lost pet
- (C) The man's plans to get a dog
- (D) Volunteer opportunities at a shelter

2 What does the woman recommend the man do?

- (A) Attend a workshop at the shelter
- (B) Wait a few months before adopting
- (C) Consult with a professional vet
- (D) Apply for a job at the local park

3 What will the woman likely do this weekend?

- (A) Help the man move to a new apartment
- (B) Sign papers to adopt her own puppy
- (C) Train a dog at the park across the street
- (D) Visit the animal shelter with her friend

Script:

M: **So, I've decided to finally adopt a dog from the local shelter this weekend.**

W: That sounds great! I remember you've been thinking about it for months. What kind of dog are you looking for?

M: Honestly, I'm looking for a smaller breed because my apartment is quite tiny. I'm a bit worried he might feel cramped.

W: Good point. Although, since there's a park right across your street, he'll have plenty of space to run around outside.

M: That's true. I also heard that the shelter provides a free training session for new owners.

W: **They do, and you should definitely take advantage of that.** It'll make the transition much easier for both of you.

M: Maybe you could come with me on Saturday? I'd love a second opinion before I sign the papers.

W: **I'd love to help! Just let me know what time works best for you.**

Conversation 2

1 What are the speakers mainly discussing?

- (A) Plans to visit some family members
- (B) The progress of a local construction project
- (C) A schedule for a film they want to see
- (D) Their favorites types of documentary films

2 What does the man imply about the Friday evening show?

- (A) It is not a good time for a documentary.
- (B) The speakers will not be able to attend it.
- (C) The renovations will be finished by then.
- (D) It is much more expensive than the matinee.

3 Why does the woman mention her parents?

- (A) To note a potential conflict with the Sunday show
- (B) To describe her plans for the upcoming Friday
- (C) To explain why local showtimes are important
- (D) To invite the man to meet them for lunch

Script:

W: **Did you happen to check the showtimes for that new documentary at the cinema downtown?**

M: I did, but it turns out they're only screening it once a day because the theater is under renovation.

W: That's too bad. I was really looking forward to seeing it on the big screen this Friday.

M: **Apparently, the evening show is already sold out.** However, they still have seats for the Sunday matinee.

W: **Sunday might work, though I usually visit my parents then.** Maybe we could go to the early show and grab lunch after?

M: Good point. I'll check if those tickets are available. Let me know if that time truly suits you.

Announcement 1

- 1 What is the main topic of the announcement?
- (A) An upcoming intramural tournament
 - (B) A change in registration fees
 - (C) A training camp for athletes
 - (D) A new professional sports league
- 2 What will every registered participant receive?
- (A) A sports bag
 - (B) A free jersey
 - (C) A cash prize
 - (D) A team trophy
- 3 What can be inferred about the tournament registration?
- (A) It is open only to varsity players
 - (B) It must be done in person
 - (C) It is handled on a first-come basis
 - (D) It requires a physical exam

Script:

M: Good evening, everyone! **I have some exciting news for you all regarding our upcoming Intramural Sports Tournament.** We are thrilled to announce that registration opens this Monday for several team sports, including soccer, volleyball, and basketball. Whether you are a seasoned athlete or just looking for a fun way to stay active, we encourage everyone to participate. **There will be prizes for the winning teams and free jerseys for all registered participants.** In addition, professional coaches will be present to offer brief workshops before the matches begin. **Space is limited, so make sure to gather your teammates and sign up early.** We look forward to seeing you on the field!

Announcement 2

1 What is the main topic of the announcement?

- (A) A local organic food market
- (B) An upcoming sustainability fair
- (C) A new environmental club
- (D) A series of outdoor workshops

2 What can participants do during the interactive workshops?

- (A) Practice professional gardening skills
- (B) Gain knowledge about reducing waste
- (C) Purchase energy-efficient solar panels
- (D) Work on local organic farm projects

3 What does the speaker urge listeners to do?

- (A) Attend the event in the South Plaza
- (B) Bring their own snacks to the fair
- (C) Sign up for specific workshop times
- (D) Donate money to environmental protection

Script:

W: Attention students and faculty. **We are thrilled to announce that the university's annual Sustainability Fair will be held this Friday in the South Plaza.** This event focuses on environmental protection and green living. **There will be several interactive workshops where you can learn about solar energy and waste reduction.** In addition, local organic farmers will provide healthy snacks for all participants. If you are interested in joining the environmental club, representatives will be available to answer your questions throughout the afternoon. **Don't miss it! This is a wonderful chance to contribute to our local community efforts. We look forward to seeing you there!**

Lecture 1

1 What is the main topic of the talk?

- (A) The cultural and spiritual significance of blue pigments
- (B) Trade routes between Afghanistan and Medieval Europe
- (C) The preservation of tropical murals in Mesoamerica
- (D) The chemical composition of ancient glass

2 What can be inferred about the availability of blue pigments in the ancient world?

- (A) Only the Egyptian civilization knew how to export blue pigments.
- (B) Blue was often one of the most difficult colors to obtain.
- (C) Synthetic blues were cheaper than other colors like red.
- (D) Blue was commonly found in most natural environments.

3 What challenge did the Maya face when using pigments for their murals and pottery?

- (A) The religious prohibition against using indigo in art
- (B) The difficulty of importing cobalt from the Chinese Yuan Dynasty
- (C) The harsh environmental conditions of the tropics
- (D) The lack of available clay in the Mesoamerican region

4 Which of the following geographical regions or sources of material is NOT mentioned in the lecture?

- (A) Afghanistan
- (B) Persia
- (C) The Mediterranean
- (D) Mesoamerica

Script:

Archaeologically speaking, **the production of blue pigment represents a significant milestone in human artistic development due to the rarity of the color in nature.** In Ancient Egypt, we find the creation of 'Egyptian Blue,' a synthetic pigment made from ground glass and copper. This vibrant hue was synonymous with the heavens and the life-giving Nile, appearing prominently in the tomb paintings of pharaohs to ensure divine protection in the afterlife. Meanwhile, in Medieval Europe, the narrative surrounding blue shifted dramatically as it became associated with the Virgin Mary. *Lapislazuli, a semi-precious stone imported from Afghanistan,* was ground into ultramarine, a pigment so expensive that its use was strictly reserved for the most sacred figures in religious manuscripts. *A striking contrast emerges in the Maya civilization of Mesoamerica.* They developed 'Maya Blue,' a remarkably durable pigment created by fusing indigo with a specific type of clay. This color was inextricably linked to rain deities and sacrificial rituals, often applied to pottery and **murals that have survived centuries of tropical weathering.** In contrast, the ceramics of the Chinese Yuan Dynasty *utilized cobalt blue imported from Persia* to create the iconic blue-and-white porcelain that eventually dominated global trade. **Across all these traditions, the color blue served as a conduit for the most profound spiritual and status-driven aspirations of society.** This enduring focus illustrates that while artistic materials are rooted in local geography, the desire to capture the transcendent is a universal human impulse.

Lecture 2

1 What is the main topic of the lecture?

- (A) The emergence of the Hudson River School
- (B) The history of the national park system
- (C) Biographies of famous New York photographers
- (D) Technical methods of light and shadow in art

2 What does the speaker imply about the Hudson River School's relationship with realism?

- (A) They only painted locations they had personally visited
- (B) They idealized nature rather than just recording it
- (C) They avoided using light to change the mood
- (D) They prioritized accuracy over artistic expression

3 Why does the speaker refer to the use of 'heavy light and shadows' in the paintings?

- (A) To contrast the school with later photographic methods
- (B) To argue that the paintings were realistic depictions
- (C) To demonstrate the lack of color in early landscapes
- (D) To explain how the painters achieved an emotional effect

4 What will the speaker most likely discuss next?

- (A) A specific example of a painting by Thomas Cole
- (B) Modern ways artists protect the environment
- (C) The development of modern urban architecture
- (D) The specific techniques for mixing oil paints

Script:

You're probably familiar with the idea of landscape painting, but it wasn't always a popular genre in America. **Its origins trace back to the early nineteenth century with a group of artists we now call the Hudson River School.** A defining characteristic is the way these artists depicted the American wilderness as a vast, divine, and untouched paradise. **They didn't just paint what they saw; they used heavy light and shadows to make the landscape look holy and magnificent.** **The turning point came when artists like Thomas Cole and Frederic Church started traveling beyond New York.** By the mid-1800s, it had spread across the entire country, influencing how Americans viewed the newly discovered Western territories. These paintings helped create a national identity and even encouraged the start of the national park system. Today, it continues to influence how we photograph nature and how we think about environmental conservation. **It's fascinating to see how a small group of painters in New York changed the way an entire nation looked at its own backyard.**

Lecture 3

1 What is the lecture mainly about?

- (A) The history of the chemical composition of Renaissance pigments
- (B) A re-evaluation of the 'Heroic Genius' theory in art production
- (C) Technical methods used specifically to paint the Sistine Chapel
- (D) The lives and personal biographies of High Renaissance artists

2 What can be inferred about the traditional view of Renaissance artists?

- (A) It overestimated the degree of isolation in the creative process.
- (B) It was primarily developed by the apprentices themselves.
- (C) It ignored the influence of Humanism on artistic development.
- (D) It focused too much on the economic aspects of the workshop.

3 What difficulty arises when we view the artist solely as a 'visionary leader'?

- (A) It makes it difficult to verify their intellectual status under Humanism.
- (B) It overlooks the contribution of specialized labor in large-scale projects.
- (C) It prevents historians from understanding the mythological themes of the art.
- (D) It creates a conflict with the supernatural talents described by peers.

4 The speaker mentions that assistants in art workshops were responsible for all of the following EXCEPT:

- (A) Painting architectural backgrounds
- (B) Negotiating contracts for new commissions
- (C) Grinding pigments into usable paint
- (D) Executing figures of secondary importance

Script:

The 'Heroic Genius' is a theory that suggests the great masterpieces of the High Renaissance were the result of the isolated, divine inspiration of single individuals like Michelangelo or Leonardo da Vinci. The traditional explanation involves the notion that these artists possessed almost supernatural talents that allowed them to transcend the limitations of their era. This was long attributed to the rise of Humanism, which shifted the cultural focus toward individual achievement and the intellectual status of the artist as something more than a mere craftsman. **More recent studies, however, have disputed the claim that these monumental works were the products of solitary labor.** A 2012 study of workshop records found that the majority of major commissions, including the Sistine Chapel ceiling, relied heavily on a sophisticated system of apprentices and specialized assistants. These individuals performed *essential tasks ranging from grinding pigments to painting secondary figures and architectural backgrounds*. This suggests that the 'genius' resided more in the artist's ability to manage a complex creative firm than in their ability to execute every brushstroke alone. **While we still recognize the visionary leadership of the primary master, we must acknowledge the collective nature of Renaissance production.** The myth of the lonely creator remains a romantic ideal, but the historical reality is far more collaborative and industrial. This discovery reshaped our understanding of the social and economic structures that underpinned the most celebrated era in Western art history.

Lecture 4

1 What is the main topic of the talk?

- (A) The process and preservation of early Daguerreotypes
- (B) The artistic training of mid-nineteenth century painters
- (C) The transition from film to digital photography
- (D) The history of silver mining in copper production

2 What can be inferred about the visibility of the image immediately after light exposure?

- (A) The image is too bright to look at without protection
- (B) The image has already begun to turn into vapor
- (C) The image is inverted and requires a mirror to see
- (D) The image cannot be seen by the naked eye yet

3 According to the speaker, what difficulty arises from the physical nature of these plates?

- (A) The mercury vapor starts to leak over time
- (B) The plates are too heavy for modern museum displays
- (C) The metal reacts poorly to modern camera flashes
- (D) The images are easily erased by physical contact

4 All of the following are mentioned as threats to the survival of Daguerreotypes EXCEPT:

- (A) Chemical oxidation
- (B) Inaccurate painting
- (C) Physical touching
- (D) Scratches on the plate

Script:

Today's talk focuses on the very first successful form of photography, known as the **Daguerreotype**. Before digital cameras or even film, artists used a complex chemical method to **capture images**. The mechanism works as follows: a photographer takes a sheet of silver-plated copper and polishes it until it looks like a mirror. This process begins when the plate is exposed to iodine vapor, which creates a light-sensitive surface. **Once the plate is placed inside a camera and exposed to light, a hidden image is formed. What enables this is a second chemical step involving mercury vapor, which makes the image visible to the human eye.** The sequence involves fixing the image with a salt solution so it doesn't fade when exposed to more light. This is crucial because, for the first time in history, people could see an exact likeness of a person or place without a painter's help. It changed how we document reality and family history. However, *the presence of oxidation and physical scratches poses a major threat* to these fragile objects today. **Because the image sits right on the surface of the metal, even a light touch can wipe it away forever. This vulnerability makes the preservation of these historical plates an urgent task** for museum conservators. The survival of these early images provides us with a hauntingly clear window into the faces of the mid-nineteenth century.

Lecture 5

1 What is the lecture mainly about?

- (A) The psychological effects of colors in advertisements
- (B) The historical development of written languages
- (C) The basic definition and application of visual literacy
- (D) The evolution of Dutch still-life painting techniques

2 The speaker states that modern political posters use low-angle shots and bold colors primarily to:

- (A) Follow current trends in photography
- (B) Create a sense of power or heroism
- (C) Hide the flaws of the politician
- (D) Make the posters more visible from a distance

3 According to the speaker, what difficulty arises from the cultural nature of visual literacy?

- (A) An outsider might completely fail to grasp the intended meaning of an image
- (B) Modern advertisements are becoming harder to understand than paintings
- (C) Visual literacy is only useful for studying ancient history
- (D) It is impossible to create art that transcends one's own country

4 According to the latter half of the lecture, all of the following can lead to misinterpreting an image EXCEPT:

- (A) Being unprepared mentally for the message
- (B) Relying only on the surface of the image
- (C) Lack of cultural context
- (D) Identifying the use of low-angle shots

Script:

In linguistics, the term 'literacy' refers to the ability to read and write words to understand a message. **In art history, visual literacy refers to the ability to interpret and negotiate meaning from information presented in the form of an image.** Think of it this way: just as you learn to decode letters to read a book, you can learn to decode symbols, colors, and lighting to read a painting or an advertisement. The parallel here is that both systems require a specific vocabulary to truly understand what is being communicated. Take the example of seventeenth-century Dutch still-life paintings. At first glance, you just see a bowl of fruit. But a visually literate viewer recognizes that a half-peeled lemon or a wilting flower is a symbol for the passing of time and the shortness of life. Now, think about modern political posters. **The use of low-angle shots or specific bold colors isn't accidental; it is designed to make the subject look powerful or heroic.** *Understanding these visual 'sentences' helps us look past the surface of what we see.* However, a major limitation of visual literacy is that it is often culturally specific. A symbol that means 'danger' in one part of the world might mean 'luck' in another. **If we don't understand the cultural context, we can easily misread the entire visual message.** *It reminds us that our eyes only see what our minds are prepared to comprehend.*

Lecture 6

1 What is the main topic of the talk?

- (A) The conflict surrounding religious images in Byzantium
- (B) The architectural history of Eastern Roman churches
- (C) The development of realistic portraiture in Rome
- (D) The preservation techniques for ancient wooden panels

2 The speaker mentions the destruction of 'centuries of mosaic work' in order to:

- (A) Provide evidence for the lack of talent in Byzantine artists
- (B) Show how the government attempted to improve artistic techniques
- (C) Explain why modern historians prefer wooden panels over mosaics
- (D) Highlight the loss of information regarding the early Christian era

3 According to the professor, what distinguishes Byzantine icons from traditional portraits?

- (A) They were originally intended to be used as secular decorations
- (B) They focus on stylized aesthetics to convey spiritual truths
- (C) They were created using materials found only in the Roman capital
- (D) They are designed to be historically accurate depictions

4 According to the lecture, all of the following are consequences or characteristics of the iconoclasm and its aftermath EXCEPT:

- (A) The loss of historical early Christian mosaics
- (B) The permanent ban of icons in current Orthodox Christianity
- (C) A preference for stylized representation over realism in icons
- (D) A change in how later artists utilized gold and light

Script:

Byzantine Iconoclasm is a practice that shaped the religious art of the Eastern Roman Empire for over a century. During this time, the government and church authorities ordered the **destruction of religious images, especially icons of holy figures**. This serves multiple functions, including centralizing the power of the emperor and attempting to reform religious practices that some felt had become too focused on physical objects. What's often misunderstood is that this wasn't just about simple vandalism or a hate for art. It was a deep theological debate. For those unfamiliar with the cultural context, it may appear to be a strange and violent overreaction to paintings. However, the movement was driven by a fear that people were worshiping the images themselves rather than the divine concepts they represented. **This perception led to the widespread destruction of centuries of mosaic work and wooden panels, creating a massive gap in our historical record of early Christian art.** Eventually, the movement failed. Today, icons are once again central to the identity of Orthodox Christianity, and they are celebrated for their stylized beauty and spiritual depth. *These icons aren't meant to be realistic portraits but rather 'windows to heaven.'* Let's now examine how *the final restoration of these images changed the way artists used gold and light in their later compositions* **to emphasize divinity over the material world.**

Lecture 7

1 What is the lecture mainly about?

- (A) The development of cardboard as an artistic material
- (B) The history and purpose of the Dada movement
- (C) The specific battles that occurred during World War One
- (D) A comparison between traditional and modern poetry

2 What can be inferred about the audience's reaction to Dada shows in the 1910s?

- (A) They often felt they were being mocked by the performers
- (B) They immediately recognized the political symbolism
- (C) They found the performances amusing and lighthearted
- (D) They encouraged the police to protect the artists

3 What challenge did traditional critics face when evaluating Dada?

- (A) They failed to perceive the deeper meaning within the chaos
- (B) They were prohibited from attending the performances
- (C) They found it difficult to write about nonsense poetry
- (D) They could not distinguish between Dada and traditional art

4 Which of the following describes a perception of Dada NOT mentioned by the speaker?

- (A) A dangerous waste of time
- (B) An attempt to joke at the audience's expense
- (C) A turning point in art history
- (D) A celebration of modern technology

Script:

Dada is an art movement that emerged during World War One as a reaction to the horrors of the conflict. This serves multiple functions, including challenging the traditional definitions of art and criticizing a society that many artists felt had lost its mind. Instead of making beautiful paintings, Dadaists organized strange performances that involved shouting nonsense poems or wearing costumes made of cardboard and trash. What's often misunderstood is that Dada wasn't just about being silly or random for the sake of it. **For those unfamiliar with the history of the 1910s, it may appear that these artists were simply making fun of the audience.** However, their goal was actually to destroy the logic and balance of high society, which they blamed for the war. This perception led to massive scandals, where the police were often called to shut down their exhibitions and shows. **Government officials and traditional critics saw it as a dangerous and offensive waste of time. They couldn't see the underlying political protest in the chaos.** *Today, Dada's status as a serious turning point in art history is widely accepted.* It paved the way for modern performance art and conceptual art by proving that an idea could be more important than the finished object. It illustrates why artists often turn to the absurd when the real world stops making sense. Ironically, the very movement that wanted to destroy museums is now celebrated in the most famous museums around the world.

Lecture 8

1 What is the main topic of the talk?

- (A) The history of stone sculpture in ancient Egypt
- (B) The chemical composition of synthetic wax pigments
- (C) The characteristics and process of encaustic painting
- (D) The development of modern oil painting tools

2 Why does the speaker refer to the fact that wax hardens 'almost instantly'?

- (A) To describe the chemical reaction between wax and pigment
- (B) To demonstrate the versatility of the heated palette
- (C) To highlight the physical dangers of the painting process
- (D) To explain why artists must work with great speed

3 Based on the comparison mentioned late in the lecture, what will the speaker most likely discuss next?

- (A) The history of pigment trade in the Mediterranean
- (B) A comparison with the drying times of oil paints
- (C) The internal structure of ancient Egyptian pyramids
- (D) A discussion on why metal tools were invented

4 What does the speaker identify as a specific visual advantage of encaustic painting?

- (A) It requires frequent chemical additives or synthetic thinners.
- (B) It cools more slowly than modern acrylic-based paints.
- (C) It provides a depth of light that is difficult to achieve with oil.
- (D) It must be applied to flexible surfaces like canvas.

Script:

Today we will look at encaustic painting, an ancient technique using heated beeswax. The mechanism works as follows: the artist melts beeswax and mixes it with dry colored pigments. This process begins when the mixture is kept fluid on a heated palette, allowing the artist to apply it to a wood or stone surface. **What enables this is the unique property of wax to cool and harden almost instantly, meaning the artist must work quickly with brushes or metal tools.** The sequence involves layering the wax and then using a heat source to fuse the layers together, **which creates a deep, luminous effect that oil paints struggle to match.** This is crucial because it makes the artwork incredibly durable; the wax is moisture-resistant and doesn't yellow over time. However, the extreme heat required can be a major threat to the artist's safety and the structural integrity of the wood if it isn't handled correctly. Because the wax can melt if exposed to high temperatures, museums must keep these works in climate-controlled rooms. The study of encaustic art shows us how ancient Egyptians and Greeks used chemistry to create portraits that still look fresh today, reminding us that the physical materials of art are just as important as the style itself.

TOEFL 2026 Edition Speaking

P1. Listen and repeat 跟讀句子

You are learning how to guide new students through the campus gym. Listen to the speaker and repeat what she says. Repeat only once.

Trainer: Welcome to our campus gym.

Trainer: Cardio machines are near the entrance.

Trainer: Free weights are in the back.

Trainer: All of our locker rooms are equipped with showers and towels.

Trainer: Our fitness instructors hold exercise classes over here.

Trainer: You can check the schedule for available classes and timings.

Trainer: If you have any questions, please seek assistance from the attendants at the help desk.

Sleep and Daily Routines

You have volunteered for a research study about sleep habits and daily routines. You will have a short online interview with a researcher. The researcher will ask you some questions.

1 Thank you for taking part in this study. Today, I'd like to ask you some questions about your sleep habits and daily routines. First, do you consider yourself a morning person who wakes up early, or a night person who stays up late? Why?

2 I see. Imagine you have a busy week ahead. You can sleep fewer hours each night to have more time for work and activities, or keep a full eight hours of sleep but have less free time. Which would you choose, and why?

3 Interesting. Next, I'd like to get your opinion. Some people believe that schools and workplaces should start later in the morning to allow people to get more sleep. Do you agree or disagree? Why or why not?

4 Good points. Lastly, wearable devices that track sleep patterns and suggest bedtime routines are becoming more common. How could widespread use of sleep-tracking technology affect people's daily lives in positive and negative ways? Explain your answer.

Language Learning

You have agreed to participate in a research study about language learning. You will have a short online interview with a researcher. The researcher will ask you some questions.

- 1 Thank you for joining the study. Today, I'd like to ask you some questions about language learning. First, have you or someone you know ever tried to learn a foreign language? What method did you or they use, such as classes, apps, or conversation practice?
- 2 I see. Imagine you want to learn a new language. You can take a structured course with a teacher, which provides guidance but follows a fixed schedule, or use a self-paced app, which is flexible but requires strong motivation. Which would you choose, and why?
- 3 Interesting. Next, I'd like to get your opinion. Some people believe that the best way to learn a language is to live in a country where it is spoken, rather than studying it in a classroom. Do you agree or disagree? Why or why not?
- 4 Good points. Lastly, AI translation tools are becoming increasingly accurate, allowing people to communicate across languages instantly. How could the widespread use of real-time translation technology affect language learning in positive and negative ways? Explain your answer.

Volunteering and Community Service

You have volunteered for a research study about community involvement. You will have a short online interview with a researcher. The researcher will ask you some questions.

- 1 Thank you for speaking with me today. I'd like to ask you some questions about volunteering and community service. First, have you or anyone you know ever volunteered for a community project or organization? What kind of work was it?
- 2 I see. Imagine you have a free weekend and want to volunteer. You can help at a local food bank, where the work is physical but the impact is immediate, or mentor a student online, where the work is less visible but may have a long-term effect. Which would you choose, and why?
- 3 Interesting. Next, I'd like to get your opinion. Some people believe that universities and high schools should require students to complete a certain number of volunteer hours in order to graduate. Do you agree or disagree? Why or why not?
- 4 Good points. Lastly, many organizations now coordinate volunteer work through online platforms and apps. How could the shift to digitally organized volunteering affect communities in positive and negative ways? Explain your answer.

Pets and Animal Care

You have agreed to participate in a research study about pets and animal care. You will have a short online interview with a researcher. The researcher will ask you some questions.

- 1 Thank you for participating today. I'd like to ask you some questions about pets and animal care. First, do you or does anyone in your family currently have a pet? If so, what kind of pet, and if not, would you like to have one? Why?
- 2 I see. Imagine you decide to get a pet. You can adopt a rescue animal from a shelter, which may have unknown health history but needs a home, or buy a specific breed from a breeder, which is predictable but more expensive. Which would you choose, and why?
- 3 Interesting. Next, I'd like to get your opinion. Some people believe that keeping pets in small apartments is unfair to the animals. Do you agree or disagree? Why or why not?
- 4 Good points. Lastly, some cities are creating more pet-friendly public spaces, such as off-leash parks and pet-friendly cafes and offices. How could making cities more pet-friendly affect residents in positive and negative ways? Explain your answer.
